

Batch response time, N = 1024 (one batch period = 410 μ s at 2.5 Msps, 205 μ s at 5 Msps, 102 μ s at 10 Msps, 51 μ s at 20 Msps)

dot = mean, thick bar = ± 1 sample std-dev, thin whisker = min-max, over all batches of all chains and repeats; configurations where the graph did not keep real time are left out (see batch_rt_sat)
